EDUCATION

Electronic Engineering Polytechnic Institute of Surabaya (PENS)
Bachelor of Computer Engineering (S.Tr.Kom.)
Study program: Applied Informatics Technology (D4)
Graduated July 2026 | GPA: **3.62/4.00**
Panasonic Scholarship Indonesia, 2025
PENS English Proficiency Test (PEPT): 577, May 2026

WORK EXPERIENCE

AI Evaluation & Environment QA Feb 2026–Present
Project-based contracts
Selected engagements: Mercor (ongoing), Tensium, Alignerr, Turing, DataAnnotation.

- Reviewed model responses and AI-generated code against scoring rubrics, flagging incorrect answers, reasoning errors, and missed instructions.
- Built repeatable checks to test edge cases and verify scoring consistency in reinforcement learning environments.

Software Engineer / Full Stack Developer Jan 2025–Dec 2025
PT Panasonic Manufacturing Indonesia (Internship)

- Built Etrained with C#, ASP.NET MVC, and SQL Server to manage training schedules, registrations, and approvals for a workforce of 1,000+ employees.
- Mapped approval rules with HR and business units and implemented workflows that route training requests to the designated approvers.
- Checked that training workflows met business requirements through functional testing and user acceptance testing (UAT).

SELECTED PROJECTS

Safety Quest | 3D Factory Safety Prototype Live demo

- Built a browser prototype with TypeScript, React, and Three.js via React Three Fiber. It lets users practice identifying and reporting hazards in a simulated factory, with touch controls for mobile.

Countlorie | Calorie Tracking App Google Play

- Worked with an Agile project team to release an app for setting daily calorie targets and logging meals and portions. The app reached 100+ downloads on Google Play.

TECHNICAL SKILLS

Languages: C#, Python, SQL, TypeScript, JavaScript
Frameworks & databases: ASP.NET MVC, React, Flutter, SQL Server
